

Do More. Faster. Right From Your Inbox.

Today's employee sends and receives nearly 200 emails a day; and faces a perpetually overfull email inbox. Buried in the daily flood of messages are important requests, tasks and questions that are getting missed. That's why YuDoGlobal has developed a way to make email more efficient. So you can do more. Faster.

YuDoMail™ is an **Email Workflow Tool** that enables the tracking of business tasks that are sent and received by email.

YuDoMail tames email communication overload by taking away the headaches associated with organising, filing, prioritising and task ownership and tracking. With effective email workflow and filtering the important items are easy to view and action, no more missed deadlines and lost tasks; whilst keeping all the benefits around ease of use, flexibility, agility and universal usage.

YuDoMail enables users to

- Turn emails into an actionable task request
- Assign task ownership
- Track progress
- Provide visibility to email initiated workload and impact to resource
- Maintain transparency on productivity and sources of workload
- Can be used by any team or department in the business – universal internal and external email workflow tool

Benefits to the Business Customer

- Saves employee time spent managing email inboxes (approx. 55% time saving)
- Reduces operational risk
- Efficient storage and quick visibility to attachments
- Data, reporting and metrics available on email trends, volumes and status
- Dashboard for immediate management oversight

The Technology

- Integrates with your existing email system and email addressees
- Enterprise grade tool
- Available as local install or cloud implementations

Stay Audit-Ready

With YuDoMail you maintain visibility into every request made manually or via email. Full audit trail is maintained and easy to access.

Ideal for teams within Operations, Finance, Prime Services and Technology, working across multiple geographical locations whether in house or outsourced.

YuDoMail is an enterprise-grade, email productivity tool that allows users to increase productivity, respond to requests faster, and manage business risk.

- Takes away the need to manually manage, organize and sort your inbox
- Automatically capture, prioritize and track action items
- Effective email volume management associating emails under single request
- Complete audit trail of emails, actions and case history notes
- Maintain visibility and transparency to all requests

Our Solution

YuDoMail™ began as a custom technology solution within the financial services industry, where email overload is a frequent source for missed requests, poor customer service and workflow inefficiencies. Our technology works alongside existing email systems to transform a user's inbox from a costly black hole into an effective request management tool.

Our Team

YuDoGlobal is led by a management team driven to solve enterprise email productivity problems.

Our management team's experience includes top-tier financial services, high-growth companies, enterprise application development, and technology start-up ventures.
